Establishment Address: _____

City: _____ Zip: _____

Location of Crop: _____

All exotic fruit fly host fruits and vegetables grown inside the quarantine area must be treated if intended for sale or for movement out of the quarantine area (see attachments).

The crop owner or grower will provide all necessary chemicals, personnel, application and safety equipment. All treatments will be conducted in accordance with the pesticide label, the attached Registration for Special Local Need, and all county, state, and federal laws. An officer from the Cooperative Exotic Fruit Fly Project must monitor all treatments. The project officer must receive advance notification of each intended application.

To be eligible for sale, the crop treatment must begin at least 30 days before harvest and a minimum of four complete applications must have been made. The applications of pesticide must continue on schedule until the last harvest is completed.

Failure to comply with the treatment schedule will result in the fruit or vegetables becoming ineligible for sale or movement.

No liability shall be attached to the Cooperative Exotic Fruit Fly Project or its employees or cooperators in the event of injury to regulated articles or property from commodity treatments or quarantine regulations.
